Green Building Basics	1
Introduction	2
Impacts of Buildings and Construction	2
Defining Green Building	3
Whole Building Design	3
Ongoing Operations & Maintenance	8
The Triple Bottom Line.....	9
Costs.....	11
Key Terms	13
References	14
LEED & the LEED Process	16
Introduction	17
USGBC	17
LEED	19
LEED Certification Benefits	20
LEED Rating Systems	21
LEED Green Building Categories	23
How to Achieve LEED Certification	24
LEED Naming Conventions	26
Rating System Structure	27
Minimum Program Requirements	30
GBCI	31
LEED Process (Non-Homes)	31
Planning - LEED Charrette	31
Project Registration	32
Documentation.....	34
LEED Online.....	34
Project Review.....	35
Certification.....	37
LEED Process (Homes)	37
Contact a LEED for Homes Provider	38
Identify a Project Team	38
Build the Home	38
Certify the Project	38
Market and Sell the Home	38
Project Resources	39
Reference Guides	39
Case Studies	39
USGBC Reports and Research	40
Customer Support.....	40
LEED Online	40
LEED Credit Checklist	40
Credit Templates and Calculators.....	41
Credit Interpretation Rulings (CIR).....	42
LEED v3	44
Credit Weighting	44
Harmonization.....	44
Regionalization	44
Case Studies & Examples	44
Case Study: Dockside Green	45
Key Terms	47
Sustainable Sites	48
Introduction	49
Site Selection	49
Choose an Optimal Site	49
Redevelop Brownfield Sites	50

Develop on Previously Developed Land	51
Develop or Select Space in Dense / Connected Areas.....	51
Choose a LEED Certified Building	52
Site Planning & Land Use.....	53
Reduce Construction Pollution.....	53
Protect Existing Sites	54
Restore Damaged Areas	54
Reduce Automobile Use.....	55
Compressed Work Week.....	55
Telecommuting	56
Reward Carpooling/Modifying Parking Fees.....	56
Locate Near Mass Transit/Provide Access	56
Bike Racks/Shower Facilities.....	57
Alternative Fuel Vehicles	57
Car Share Programs.....	57
Minimize Parking Lots.....	58
Restore Natural Areas/Stewardship.....	58
Reduce Stormwater Runoff.....	58
Reducing Heat Islands.....	60
Building/Infrastructure Size	62
Undercover / Underground Parking	63
Green Roofs	64
Shading.....	64
Cool Roofs	64
Cool Pavements	66
Open-grid Pavement.....	66
Eliminating Light Pollution.....	66
Lighting Design	67
Computer Models	67
Lighting Controls.....	68
Light Fixtures and Placement	68
Management Decisions	69
Building Exterior Management.....	69
Snow and Ice Removal	69
Landscaping	69
Integrated Pest Management.....	70
Case Study: Emory University Whitehead Biomedical	70
Case Study: Dockside Green	71
Site Selection.....	71
Site Restoration	71
Light Pollution Reduction	71
Alternative Transportation.....	71
Key Words.....	73
References	75
Water Efficiency	76
Introduction	77
New in LEED 2009	77
Outdoor Strategies.....	78
Landscape Design	78
Irrigation Practices	79
Landscape Maintenance.....	81
Use Stormwater and/or Graywater	81
Indoor Strategies.....	83
Dual-flush Toilets	84
High-Efficiency Toilets	84
Waterless Urinals.....	85
Composting Toilet Systems	86
Low-flow Showerheads and Faucets	87
Faucets with Low-flow Aerators and/or Motion Sensors	87
Install Water Meters	88
Use Stormwater and/or Graywater	88

Wastewater Treatment & Reuse	89
Process Water Strategies	90
Cooling Towers	90
Case Study: Bank of America Tower at One Bryant Park	90
Strategies Used	91
Case Study: Dockside Green	92
Key Terms	94
References	95
Energy & Atmosphere	97
Introduction	98
Goal Setting	98
Reduce Energy Use	99
Energy Audit	99
Building Orientation	100
Site Location	100
Building Envelope	100
Lighting Design	102
Light Bulb Choice	102
Lighting Controls	104
Water Use	105
Tankless Water Heaters	105
Heating & Cooling	105
Design	106
ASHRAE	106
Example: Herman Miller MarketPlace	106
Air Filters	107
Natural Ventilation	107
Underfloor Air Distribution	108
Appliances	109
Building Automation System	110
Use Renewable Energy	110
Solar Power	110
Geothermal Heat Pumps	113
Example: Whitmore Lake High School	115
Off-Site Renewable Energy	116
Common Types of Off-Site Renewable Energy	118
Goal Reaching	119
Goal Verification	120
Commissioning Activities	121
Goal Measurement, Monitoring, and Improvement	121
Ozone Depletion	122
CFCs	123
Montreal Protocol	123
Phase-out Plans	123
Refrigeration Design	124
Case Study: Qualcomm	124
Case Study: Symantec	125
Case Study: Dockside Green	125
Energy Performance Designed to Save	125
Energy Efficient Appliances	125
Energy Efficient Lighting	126
Metering	126
Measurement and Verification	126
Commissioning	126
BioMass Heat Generation	126
Greenhouse Gas Neutral	127
Renewable Energy	127
Key Terms	128
Materials & Resources	130
Introduction	131

Reducing Waste	131
Construction Waste Management.....	131
Reduce, Reuse, Recycle	133
Source Reduction	133
Use Less Material	133
Reuse – Buildings.....	134
Reuse – Salvaged Materials	135
Recycling	136
Maintain Occupancy Rates	136
Sustainable Materials	137
Regional Materials	138
Rapidly renewable materials.....	139
Example: Santa Clarita Transit Maintenance Facility.....	140
Certified Wood	140
Recycled Materials	141
Durable Goods.....	143
Sustainable Purchasing	143
Low Elemental Mercury Light Bulbs.....	143
Certified Products	144
Case Study: Dockside Green	145
Use of Local Products (Regional Materials).....	145
Sustainable Materials.....	145
Key Terms.....	147
References.....	149
Indoor Environmental Quality.....	151
Introduction	152
Costs.....	152
Improve Indoor Air Quality.....	153
Source Control	154
Protecting the Site During Construction.....	154
Secondhand Smoke	156
CO2 Monitoring.....	156
Material Off-gassing.....	156
Radon	158
Green Cleaning.....	158
Improve Ventilation.....	160
Minimum Air Quality.....	161
Increase Ventilation	161
Air Filters.....	162
Increase Occupant Comfort.....	162
Daylighting.....	163
Daylighting Benefits	163
Daylighting Areas.....	164
Daylighting Issues.....	165
Daylighting Controls.....	165
Skylights	165
Light Shelves	166
Sun Tubes	166
Views	167
Occupant Control.....	167
Temperature Control.....	167
Lighting Control.....	169
Acoustics	169
